LCM 750

THE ART OF VISION

Sit in Style

Anchors On the Concept Of Movement

Elegant curves in a rhythmic dance, full of vitality, Flowing throughout in function and detail.

LCM750

For Conference

Sit in comfort and aesthetic beauty, LCM 750 brings satisfaction and joy to your work.

LCM750

For Executive

LCM750

LCM 750's floating backrest elevates user movement and support. It's 5° tilt range with supports effortlessly without activating the main mechanism. Let the body rotate more easily, and various office postures can be freely converted.

Move Freely

The unique chair base is a hybrid of aluminum and engineered plastic, which not only bears the pressure of the chair body but also avoids the abnormal noise rubbing against the casters. The 65mm oversized casters make the seat chassis more stable, allowing you to rotate the chair freely at will.

Color

Made of high-quality eco-friendly antibacterial fabrics, breathable, comfortable and durable.

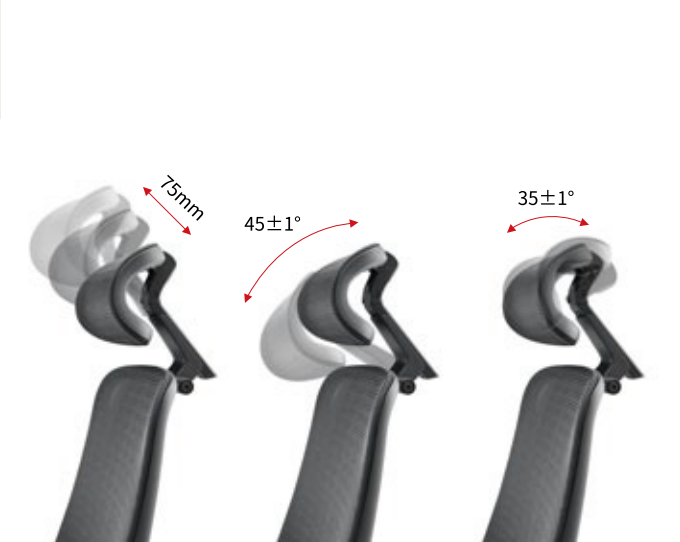

With a variety of colors to choose from, easily suitable for various environments and settings.

Functions

Recline
The backrest can be locked and unlocked by turning the left lever under the seat assembly. The maximum tilt angle is 30°, and has the function of locking the initial angle and 3-stage angle range limit.

Adjustable Headrest (3D Adjustable)

Adjustable Armrest (4D Adjustable)

Lumbar Support
Height Adjustable (Range 70mm)

Seat up and down adjustment
Height Adjustable (Range 70mm)

Seat Depth Adjustment
The depth of the seat cushion can be adjusted by the left lever under the seat cushion (range 50mm)

LCM 640

FUNCTION LEADER

LCM640

LCM 640 is an intelligent office chair with modern industrial design and ergonomics. Not only has 4D space adjustable movable armrest, but also up and down adjustable lumbar support combined with strong elastic mesh back to provide the most comfortable and healthy support for your spine. Lorka, always provide you with health assurance.

LCM640

LCM640

Unique and ingenious design, the best products to create.

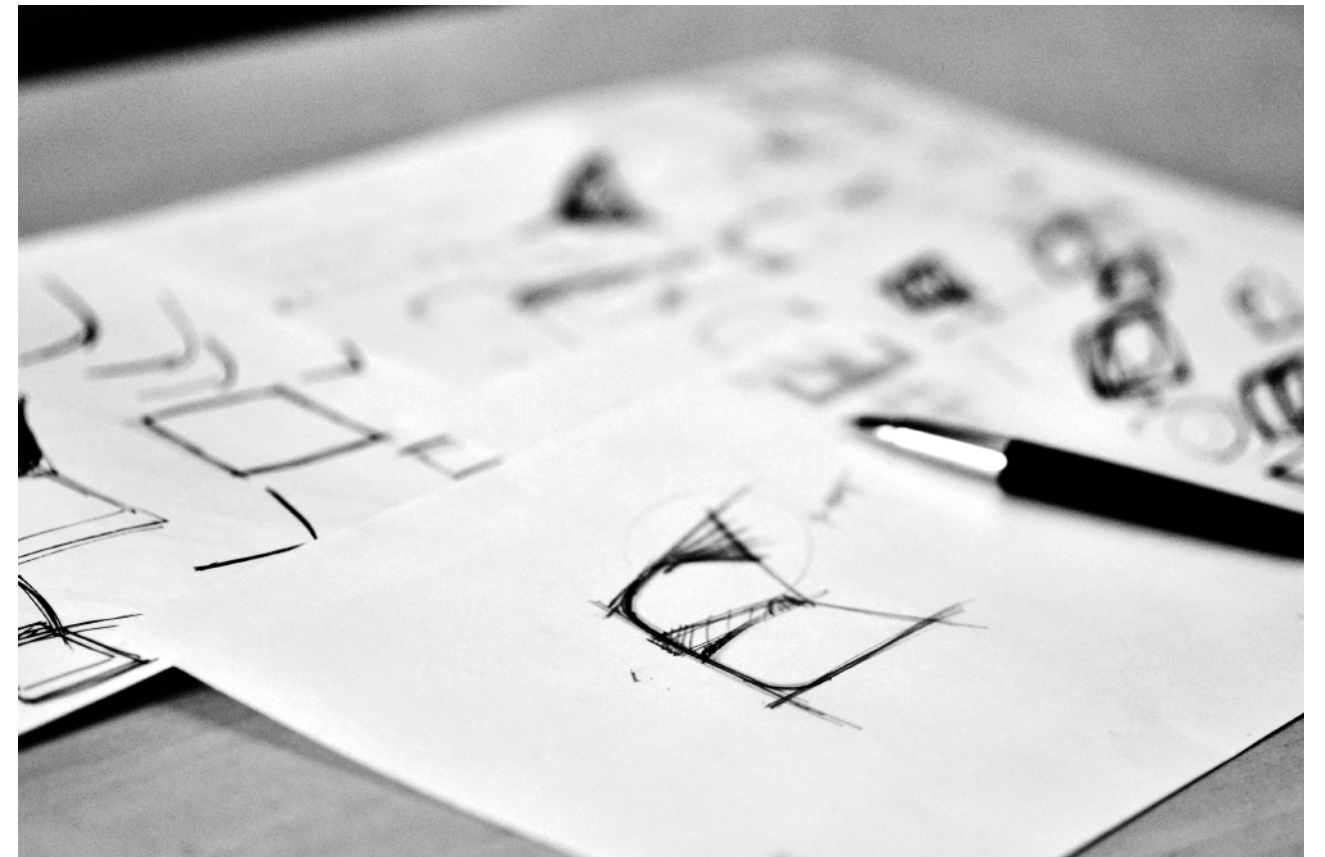

LCM640

Elaborate design, only for the product more outstanding

We pay attention to the research of manufacturing technology, and hope to combine ergonomics, design aesthetics and process cost to find better solutions, Bring more comfortable experience to customers.

Adhere to the continuous exploration of product innovative design

The soft and beautiful lines permeate the eternal attraction. Through the impeccable balance, implicit and low-key details, and the practical breathable mesh back design, it deduces the essence of seat innovation and leads the modern fashion and leisure style. It is attractive at first sight.

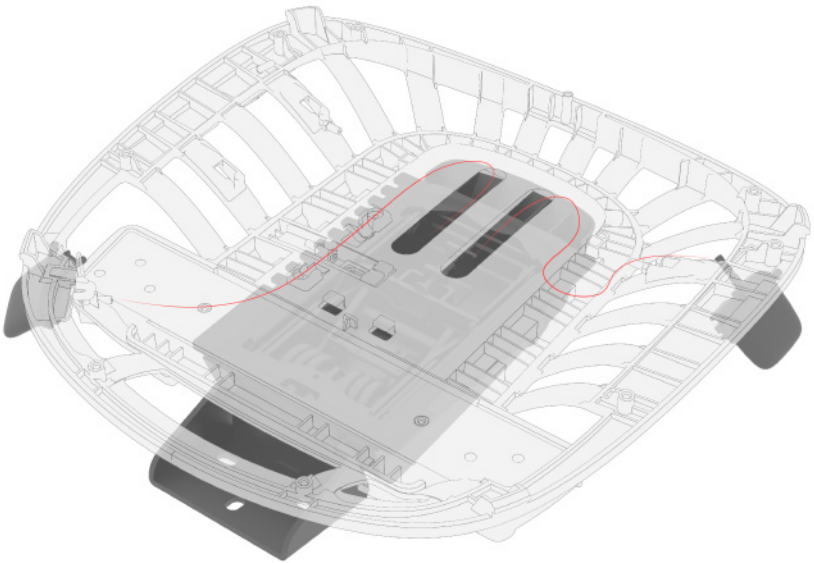

NEW TREND

The swivel chair we design helps you possess a healthy sitting posture. And it can improve blood circulation and speed up the metabolism.

Firm backrest

The material is thick and solid, with high quality engineering materials and first-class injection molding technology, with exquisite modeling and perfect details. The design of reclining back increases the elasticity of the chair, which makes the "chair" portable.

In line with the principle of ergonomics, the back is rotating around the axis point on the seat. It is adjusted according to the self weight of the human body. There is no need to use other mechanisms to adjust the spring. The cushion and back of the seat can move close to the body and have the function of safety protection.

One adjusting lever controls lifting and the other controls locking gear. There are 4 gears in total. The operating handle is in the position that is within reach, and there is no need to bend over to adjust the seat.

Exquisite details

The cushion is one-piece shaped foam, which has passed the environmental protection test of EU and reached the first class fire protection standard of the United States. The bottom of the cushion has elastic hollow out "basket" bottom support design.

LCM640

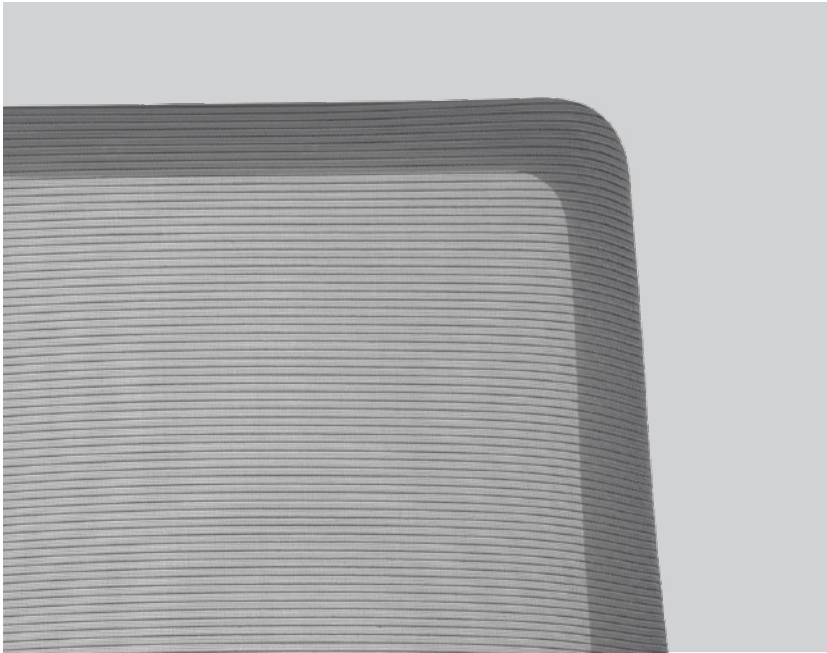

Aesthetic appearance

The LCM 640 range offers a wide range of color and fabric options with headrests for easy integration into any environment.

Ergonomics for all

Everyone in the office should always pay attention to their spinal curve, maintain the correct sitting posture and get ergonomic support. With built-in low bone reinforcement design and adjustable lumbar support, LORKA's engineering design is cost-effective and conducive to the promotion of employee health management.

Strong support

Wentex brand air permeable 3D mesh fabric imported from South Korea is selected, with comfortable touch, strong wear resistance and good air permeability. The medley series of Gabriel brand in Denmark not only passes a series of tests such as environmental protection, combustion and wear resistance, but also has a variety of fashionable and beautiful charming colors to choose from.

Superior performance

LCM 640 is durable and manufactured to high standards and quality. LCM 640's back option is made of durable, breathable imported mesh that performs well in any environment - home space, office, study or healthcare environment.

Every line shows the seduction of fashion and beauty.

Outstanding quality and taste.

Let's be happier at work than at rest.

The curve is the basic line of human body. The designer fixes the product shape by the basic research method of physiology. Every line we design fully fits the curve of human body. Even though you sit on this chair for a long time, you still can feel not tired, even more comfortable. It is more free to change complexity into simplicity. The design concept of simplicity and extraordinary, confusion and not disorder is followed everywhere. The beauty of light simplicity can be easily perceived in daily use.

Natural and comfortable

LCM640

Extraordinary personality Powerful all the time

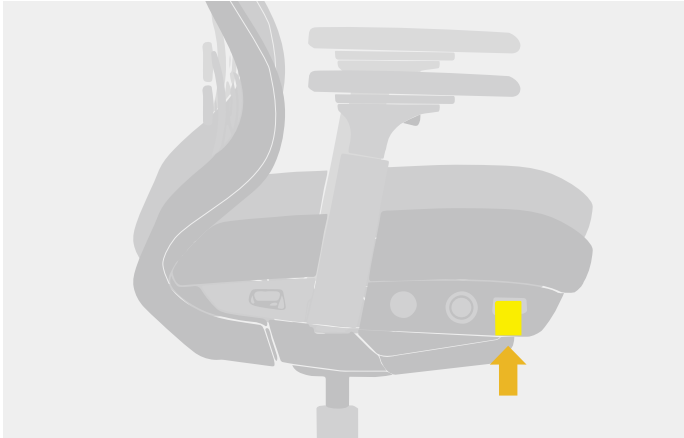

The double comforts of ventilated reticular backrest and soft massage waist pillow can improve curve fitting. It lets you happily work and passionately create wealth.

When mental work replaces physical labor and becomes the mainstream of this society, sitting inevitably becomes the most important form of work in the office. Sitting is different from sitting for a long time. Whether sitting comfortably and scientifically is related to the physical and mental health of workers and the sustainability of work.

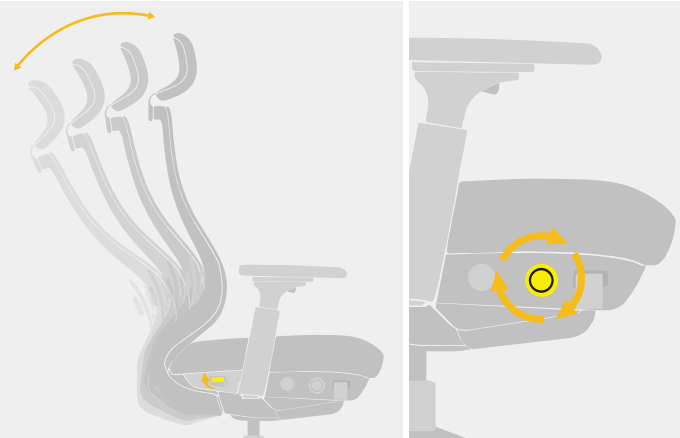

A modern conference room with a large, light-colored wooden table and several ergonomic chairs. The room has a large window on the left side, providing a view of the outdoors. The wall on the right is made of dark wood. A large, curved, white light fixture hangs from the ceiling. A wall-mounted display shows a blue screen. The floor is covered with a dark, textured carpet. The text "LCM640" is visible in the top left corner, and "XK02TDAL" is visible in the bottom right corner.
